

Driving Green Industry Transformation in Türkiye

Advancing sustainable industry, circular economy and climate action in Türkiye

MISSION IN TÜRKİYE

United Nations Industrial Development Organization (UNIDO) Türkiye Country Office supports sustainable industrial development through circular economy, climate action, industrial decarbonization, resource efficiency, and cleantech innovation ecosystem. Working closely with key government ministries, including the Ministry of Industry and Technology; the Ministry of Environment, Urbanization and Climate Change; the Ministry of Agriculture and Forestry; the Ministry of Energy and Natural Resources; and the Ministry of Trade, as well as public institutions, private sector partners, and the UN Country Team, UNIDO contributes to Türkiye's green transition and the UN Sustainable Development Cooperation Framework (UNSDCF) 2026–2030 by promoting resilient industries and low-carbon development pathways.

OUR IMPACT

UNIDO's technical cooperation strengthens Türkiye's transition toward resource-efficient and low-carbon industrial systems through policy support, innovation programmes, and pilot initiatives. Through close collaboration with national institutions, municipalities, private sector actors, and UN partners, UNIDO promotes sustainable electronics management, circular economy approaches, and green entrepreneurship. These initiatives enhance institutional capacity, support cleantech startups and entrepreneurs, advance sustainable biomass energy solutions, and contribute to Türkiye's green transition goals.

FLAGSHIP PROGRAMMES

- Industrial Decarbonization and CBAM Readiness
- Global Electronics Management (GEM) Project
- Global Cleantech Innovation Programme (GCIP)
- Inclusive Green Transition Programmes
- Circular Economy and Waste Management Programmes
- International Environment Conventions (Montreal Protocol, Stockholm Convention, Minamata Convention, etc.)
- Energy Efficiency and Low-Carbon Industrial Transformation
- Sustainable biomass energy solutions and supply chain development to advance thermal energy transformation and heat practices across Türkiye's agro-industrial sector.

OUR PRIORITIES IN TÜRKİYE

Circular Economy Solutions
Promoting resource efficiency, circular economy approaches and circular business models across industries.

Industrial Decarbonization (iron-steel, aluminium, fertilizer and cement sectors)
Accelerating low-carbon industrial transformation and climate-resilient manufacturing practices.

Sustainable Waste Management
Strengthening environmentally sound waste and chemicals management systems in Türkiye.

Green Innovation and Entrepreneurship
Empowering cleantech startups, innovators and SMEs through sustainable technologies, green entrepreneurship and innovation acceleration programmes.

Inclusive Green Transition
Supporting inclusive green transition and sustainable development practices.

STRATEGIC VISION WITHIN THE UN SYSTEM

To promote and accelerate inclusive and sustainable industrial development by supporting industrial transformation, renewable energy use and climate-resilient industrial infrastructure through decarbonization; facilitating technology transfer, advancing cleantech startups and entrepreneurs ecosystem, circular economy, and cleaner production practices; fostering inclusive growth and accelerating resilient economic transformation through technical cooperation and multi-stakeholder partnerships.
